

I'm writing to request that the FCC NOT implement or even consider, any proposal that would lessen Indiana's Telephone Privacy law protections. Since it's implementation, I have enjoyed being at home in the evenings and weekends. Before, I averaged 10-15 calls per week that were unwelcome and often, intrusive. Since I registered for the "No Call" listing, I have received maybe one per week at the most. This law has given me back my privacy and I can't express the difference that has made. There are still many avenues of marketing for companies/agencies to utilize to give the public information on services and the like so I ask that you keep the current status in terms of Indiana. Thank you for your consideration.
